If the Flood was local ...

• Why did Noah have to build an Ark? He could have walked to the other side of the mountains and missed it.

• Why did God send the animals to the Ark so they would escape death? There would have been other animals to reproduce that kind if these particular ones had died.

• Why was the Ark big enough to hold all kinds of land vertebrate animals that have ever existed? If only Mesopotamian animals were aboard, the Ark could have been much smaller.

• Why would *birds* have been sent on board? These could simply have winged across to a nearby mountain range.

If the Flood was local ...

• How could the waters rise to 15 cubits (8 metres) *above* the mountains (Genesis 7:20)? Water seeks its own level. It couldn't rise to cover the local mountains while leaving the rest of the world untouched.

• People who did not happen to be living in the vicinity would not be affected by it. They would have *escaped God's judgment on sin*. If this happened, what did Christ mean when He likened the coming judgment of all men to the judgment of '*all*' men (Matthew 24:37-39) in the days of Noah? A partial judgment in Noah's day means a partial judgment to come.

• God would have repeatedly broken His promise never to send such a flood again.
